

# DigolT Solutions Pvt Ltd

Empowering Ideas. Delivering Excellence.

AI | IoT | SAP | Cloud | Cybersecurity | Digital Products

# Who We Are

**DigoiT Solutions Pvt Ltd** is an end-to-end IT services and digital solutions company enabling enterprises to modernize operations, secure digital assets, and leverage data-driven intelligence.

We combine deep expertise in **AI, IoT, SAP, Cloud, and Cybersecurity** with a strong execution framework to deliver scalable, secure, and future-ready technology solutions for businesses across India and global markets.

**Global Delivery Mindset**

# What We Do

## AI & Machine Learning

Predictive insights, automation, and intelligent decision making.

## Internet of Things (IoT)

Real-time device connectivity, monitoring, and analytics.

## SAP & Enterprise Systems

Implementation, integration, migration, and optimization.

## Cloud & DevOps

Scalable infrastructure, automation, and cloud modernization.

## Cybersecurity

Enterprise-grade security, compliance, and risk management.

## Custom App. Development

Tailored ERP, CRM, and business applications.

# Industries We Serve

Manufacturing

Energy & Renewables

Infrastructure & EPC

Utilities

Logistics & Supply Chain

Enterprise & Conglomerates

# Core IT Service Capabilities

## AI & ML Solutions

- Predictive analytics & forecasting
- Process automation & optimization
- Business intelligence & insights

## IoT & Industrial Intelligence

- Device integration & telemetry
- Real-time monitoring dashboards
- Predictive maintenance systems

## SAP & Enterprise Platforms

- SAP implementation & rollout
- Migration & system optimization
- ERP, CRM & enterprise integration

## Cloud & DevOps Engineering

- Cloud architecture & migration
- CI/CD automation & DevOps pipelines
- Scalable & secure infrastructure

## Cybersecurity & Compliance

- Risk assessment & vulnerability management
- Data protection & access control
- Compliance & security governance

## Custom Enterprise Applications

- ERP & CRM development
- Workflow automation systems
- Scalable business platforms

# SAP Expertise & Enterprise Solutions

End-to-end SAP services tailored for enterprise environments

## 1 SAP Implementation & Rollouts

- Greenfield & Brownfield implementations
- Module customization & configuration
- Go-live & post-implementation support

## 2 SAP Migration & Optimization

- Legacy ERP to SAP migration
- Performance tuning & system optimization
- SAP modernization & scalability

## 3 SAP Integration & Extensions

- SAP + IoT / AI / Analytics integration
- ERP, CRM & third-party system integration
- Custom SAP extensions & workflows

# Products & Platforms

Enterprise-grade platforms built for scalability, intelligence, and operational excellence

## Enterprise Asset Management Platform

Centralized, intelligent asset lifecycle management for modern enterprises

- Real-time asset tracking & geo-fencing
- Inventory, maintenance & lifecycle management
- AI-assisted insights & operational control
- Enterprise-ready, scalable & ERP-integrated

## Solar AI Analytics Platform

AI-driven performance intelligence for solar power plants

- Real-time monitoring without SCADA dependency
- AI-based forecasting & anomaly detection
- Soiling, cleaning & yield optimization
- Scalable across single & multi-plant portfolios

# Enterprise Asset Management Platform

## Business Challenges

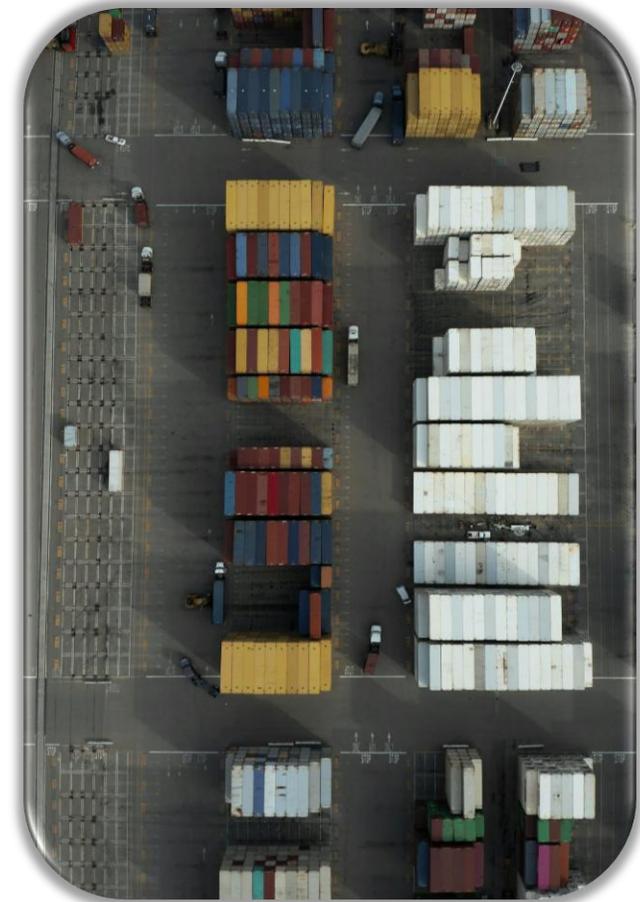

- Limited real-time visibility of asset location & usage
- Manual inventory, tracking, and maintenance processes
- High downtime and unplanned maintenance costs
- Weak accountability across departments and sites

## Our Platform Enables

- Real-time asset tracking with geo-fencing & alerts
- Centralized inventory, maintenance & lifecycle management
- AI-assisted insights for faster operational decisions
- Role-based access, audit readiness & compliance

## Business Impact

- Reduced asset loss and misuse
- Improved maintenance efficiency & uptime
- Better compliance and audit readiness
- Optimized asset lifecycle costs

# Solar AI Analytics Platform

## Business Challenges

- Limited real-time visibility into plant performance
- Inaccurate forecasting leading to DSM penalties
- Energy losses due to soiling, faults, and inefficiencies
- High dependence on manual monitoring and SCADA systems

## Our Platform Enables

- Real-time monitoring without SCADA dependency
- AI-based forecasting, anomaly detection & alerts
- Soiling analysis, cleaning optimization & yield recovery
- Centralized monitoring across single & multi-plant portfolios

## Business Impact

- 5–10% improvement in energy generation
- Reduced downtime and faster fault resolution
- Lower operational costs and DSM risk
- Improved ROI across solar assets

# Why DigolT?

## End-to-End Technology Partner

From strategy and implementation to platforms, support, and optimization.

## Product + Services DNA

Enterprise platforms backed by strong AI, IoT, SAP, and cloud engineering.

## Enterprise & SAP Expertise

Proven capability across SAP implementations, integrations, and migrations

## India + Gulf Market Readiness

Delivery models and solutions aligned to enterprise and GCC market needs.

# Our Engagement Model

A structured, transparent, and scalable approach to delivery

## Step 1 — Discover

- Business understanding & requirement analysis
- Stakeholder alignment
- Success criteria definition

## Step 2 — Design

- Solution architecture & roadmap
- Technology & integration planning
- Security & compliance considerations

## Step 3 — Build

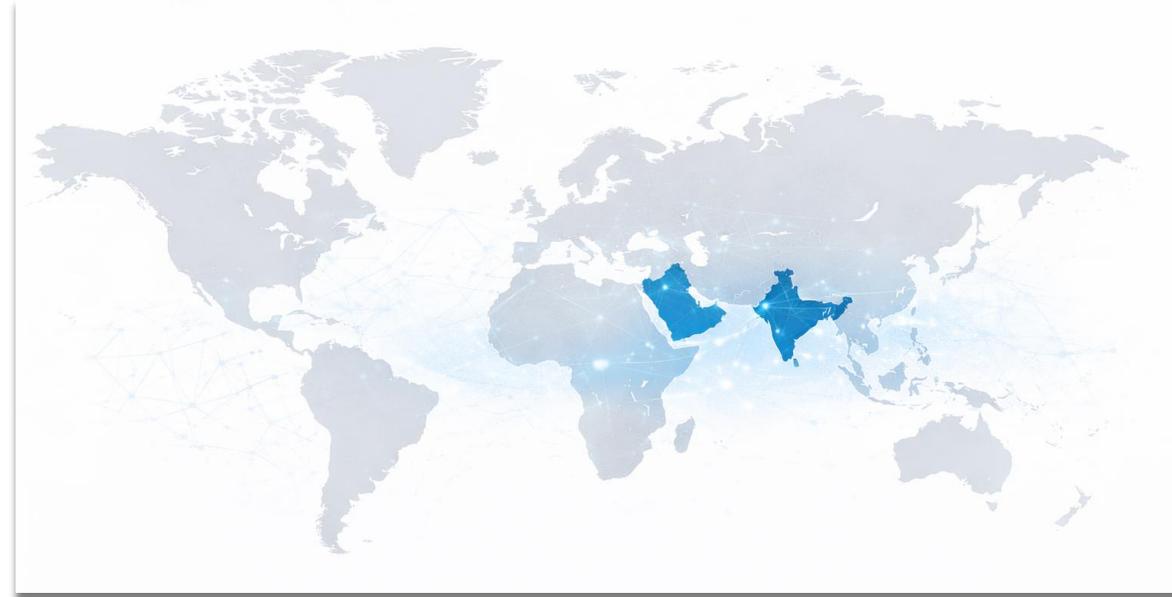

- Agile development & implementation
- SAP / Cloud / AI / IoT execution
- Continuous testing & validation

## Step 4 — Run

- Deployment & go-live support
- Monitoring, optimization & enhancements
- Ongoing support & SLA-driven operations

# Global Delivery & Market Coverage

Trusted delivery models supporting India and GCC markets

## Delivery Presence

- India (Primary delivery hub)
- GCC markets (UAE, Saudi Arabia, Qatar, Oman, Kuwait, Bahrain)

## Delivery Model

- Offshore & hybrid delivery models
- Remote-first, enterprise-grade execution
- Secure and compliant delivery practices

# Contact Us

## Company Name

DigoIT Solutions Pvt. Ltd.
